Trend: Estimated Total Body				
Measured Date	Age (years)	Tissue (%Fat)	Tissue (%Lean)	Centile ^{2,3}

Note: Estimated composition results are based upon both Spine and Femur analysis

Note: Some estimated composition results may not be available because the patient total body fat is below 10, (a/g) spine tissue thickness is below allowable BMI range, and (a/g) femur tissue fat is below 12%.
