Comment

eGFR (mL/min/1.73m²) calculated by CKD-EPI formula - see www.kidney.org.au
Please note: As an aid to patient assessment, additional pathologist approved testing has been performed and a CK result reported at no charge. Release of enzyme(s) from muscle may be contributing to elevated LFTs. See below/overleaf for check-list of causes of an elevated serum CK or visit <http://protocols.sonichealthcare.com/dhm/CK.pdf>
